SUMMARY

Adaptable IT Professional and Network Specialist specializing in IT infrastructure management, cloud computing, and server virtualization. Combines a technical background in Telecommunication Engineering with practical expertise in colocation data centers, network routing (Mikrotik), and cybersecurity fundamentals. Proven capability in maintaining high system availability using Proxmox and cloud platforms (AWS/GCP/Azure). Forward-thinking professional tech enthusiast actively integrating Local AI models to optimize enterprise workflows and infrastructure automation.

EDUCATION

Telkom University Aug 2020 – Feb 2024
Telecommunication Engineering, GPA: 3.29 / 4.00

WORK EXPERIENCE

Founder & Chief Executive Officer (CEO) | LtSamune Hosting Jan 2020 – Jun 2025

- Infrastructure & Architecture:** Architected and deployed bare-metal physical servers utilizing custom X99 platforms for colocation datacenters; migrated legacy infrastructure from cloud providers (AWS, OVH, Contabo, Alibaba Cloud) to self-hosted environments to optimize operational costs.
- System & Network Engineering:** Designed and managed web hosting panels using Pterodactyl, configured Linux administration environments, automated database management (MySQL, PhpMyAdmin, SQLite), and implemented robust Layer 4 & Layer 7 Anti-DDoS mitigation strategies.
- Team & Operations Management:** Recruited and led a cross-functional team of 10 staff members to handle customer service, web development, and infrastructure maintenance across a digital-first community platform (Discord).
- Business Development:** Spearheaded international business negotiations with foreign stakeholders, expanded global client acquisition, and managed complete end-to-end service delivery and custom billing integration (PHP/React).

IT Infrastructure & Service Management Intern | PT. GS BATTERY Sep 2022 – Des 2022

- Technical Support & Helpdesk:** Acted as the primary point of contact for cross-departmental user issues; diagnosed and resolved hardware, software, printing, and peripheral connectivity faults under strict SLAs.
- Identity & Access Management:** Administered user credentials, security groups, and password resets within the corporate Active Directory environment to ensure seamless access control.
- On-Site Network Maintenance:** Conducted hands-on troubleshooting and termination of local area network (LAN) infrastructure across corporate offices and expansive industrial manufacturing plant sites.
- IT Asset & Lifecycle Management:** Performed routine preventative hardware maintenance (PC cleaning and hardware optimization) and systematically organized physical IT assets during department auditing and relocation processes.

PROJECTS

Local AI Assistant Deployment Apr 2025 – Jan 2026

- Engineered and deployed a privacy-focused local Large Language Model (LLM) assistant utilizing Ollama and LM Studio environments.
- Implemented a hybrid information retrieval system allowing the AI to seamlessly query local vector databases and external internet sources.
- Optimized model inference performance on local hardware to deliver a responsive, zero-data-leak desktop companion for daily workflows.

Certificate

- Cisco Networking Academy (CCNA v7):** Introduction to Networks | Switching, Routing, and Wireless Essentials | Enterprise Networking, Security, and Automation
- Cisco Networking Academy:** Cybercops Associate
- Occupational Safety and Health (OSH) Supervision Training – Ministry of Manpower of the Republic of Indonesia

Language

- English
- Indonesia

TECHNICAL SKILL

- **Systems Administration & Virtualization:** Windows Server, Active Directory, Ubuntu Linux, Proxmox VE, Windows Hyper-V, Pterodactyl Panel.
- **Networking & Security:** MikroTik (Winbox), Anti-DDoS (L4/L7 Mitigation), Fiber Optic Technologies, CCTV Systems.
- **Cloud Computing & Storage:** Google Cloud Platform (GCP), Microsoft Azure, Amazon Web Services (AWS), Synology NAS (DSM).
- **Hardware & Infrastructure:** Bare-Metal Server Assembly (X99 Platforms), Desktop Troubleshooting, Hardware Maintenance, Data Center Colocation.
- **Artificial Intelligence (AI) Tools:** Ollama, LM Studio, Local LLM Deployment.
